**For shipping:**

✓ ADR ✓ RID ✓ ADN ✓ IMDG ✓ IATA

### Description

The lithium battery mark is to be used to mark packages for shipment with the following provisions/packing instructions:

- Special Provision 188 (ADR, RID, ADN, IMDG).
- P.I. 968 Sect. IB (IATA)\*.

The product is printed with UV protective coating.

It has a permanent adhesive with internal and external durability of 3 years with support for tearing between labels.

The product has a heat-shrink wrapping and its country of origin is Italy. As required by the IMDG Code, the adhesive is durable after immersion of 3 months at sea (IMDG Code 5.2.2.2.1.7).

The label is compliant in design, size, colour and symbol to the requirements of the regulations. \*A label 9A is also required (always check with your consultant for the correct labelling and marking to be applied to the package).
