Description

UN certified 1A1 and 1A2 steel drums with non-removable head (1A1) and with removable head (1A2). Our drums are suitable for the shipment of dangerous liquids and solids from Packing group I, II and III (depending on the case). Resistant and robust, the UN certified drums are available with a capacity of 220 L. The UN certified 1A2 steel drums are approved for the shipment of solids and are fitted with a removable head with a tie closure. The inner part of the drums is available both in the rough version and in the lacquered version. The UN certified 1A1 steel drums are approved for the shipment of liquids and are fitted with a removable head with a tie closure. The inner part of the drums is available both in the rough version and in the lacquered version. Both types of steel drums, UN certified 1A1 and 1A2 are stackable and easily stored. The UN certified steel drums are compliant for the shipment of dangerous goods according to all modes of transport, by road ADR, by railway RID, by waterway ADN, by sea IMDG and by air ICAO-TI / IATA.

Attention: before using any inner packaging, it is necessary to check the chemical compatibility between the container and the dangerous goods that you want to insert.
