TECHNICAL DATASHEET

Code	FUST-AQ120-BL
Brief Description	UN 1H2 HDPE plastic drum square sectioned of 120 L
Approval	1H2/X200/S/**
Capacity	120,00 L
Country of origin	Italy
Dimensions outer	ø500 x 890 h mm
Dimensions pallet	1200 x 1000 x 2860 h mm
Mouth diameter	330
Weight	5.00 kg

For shipping:

✔ ADR ✔ RID ✔ ADN ✔ IMDG ✔ IATA

Material for which it has been approved	Closing
Solids	Movable top with tie

Description

UN certified 1H2 plastic HDPE drums with square section for solids

UN certified 1H1 and 1H2 plastic drums are made of high density polyethylene (HDPE). Two different types of UN-certified drums are available: UN certified 1H1 plastic drums (drums with non-removable head) and UN certified 1H2 plastic drums (drums with removable head). The UN certified plastic drums, supplied by Serpac, are suitable for the shipment of dangerous liquids and solids belonging to the Packing Group I, II and III, depending on the chosen type. Resistant and robust, the UN certified 1H1 and 1H2 drums are available with different capacities. The plastic drums are ADR, RID, ADN IMDG and ICAO-TI / IATA approved for safe and compliant shipment of your dangerous goods by road, by railway, by waterway, by sea and by air.

Attention: before using any inner packaging, it is necessary to check the chemical compatibility between the container and the dangerous goods that you want to insert. It is also important to check with which liquids the tests have been carried out to be able to compare and identify with certainty whether the drum to be used has been tested and approved for the kind of liquid to be inserted. The certified drums, depending on the case, can be used for the shipment of liquid or solid dangerous goods. Available plastic drums in capacities from 30 L, 60 L, 120 L approved for solids or 220 L approved for liquids.
